MEET HEATHER & KAYDANCE

Heather, a single mother, faced the challenges of caring for her middle child, Kaydance, who was diagnosed with epilepsy at age 3.5. Despite Kaydance's complex epilepsy and the various treatments she underwent, including medications, VNS, and Deep Brain Stimulation, her seizures persisted. Reflecting on the support received, Heather emphasizes the profound impact it had on her ability to advocate for Kaydance's educational needs. With EDR's guidance, Heather gained confidence in navigating the complexities of her daughter's care, ensuring that Kaydance received the best possible support.

It is with heartfelt sadness that we share that on July 3rd, 2024, Kaydance tragically passed away. Throughout this difficult journey, Epilepsy Durham Region continues to provide unwavering support to Heather and her family, standing beside them as they navigate their grief, and ensuring that Kaydance's legacy of pure kindness and love will live on.
